

CAPABILITIES

WE ARE REMOTE GROUP WA

Remote Group WA (RGWA) is a Registered Builder and leading provider of remote area, non-process infrastructure solutions for the mining and resources sectors. Specialising in the supply and installation of villages and ancillary structures, RGWA design, source, install and maintain your remote buildings and infrastructure to exacting standards.

RGWA try and keep it simple. We aspire to be welcomed back wherever we've been, and we do this by focusing on what matters to our people and our customers.

At the heart of it is our Values.

- **Safety** is our first value.
- We treat everyone with **Dignity and Respect**, and we value Diversity.
- We are old school. A handshake is the premise on which we operate, so we are **Accountable** for our actions and undertake to deliver on our commitments.
- We value **Integrity**. For us, this means taking things on face value, speaking in plain English and being believable in our words and actions.

PROUDLY SUPPORTING

02

SERVICES

Remote Group WA understands the general business of mining companies is often distracted by the need to expand their non-core business such as villages and non-process infrastructure, so our turn-key approach to establishing and or maintaining these facilities is a welcome approach by our clients.

TURN-KEY PROJECTS

Including pre-feasibility concepts, full design and documentation, sourcing of infrastructure, throughout construction and beyond, Remote Group WA will be with you every step of the way.

SUPPLY AND INSTALLATION

Our expansive networks allow us to source high-quality, new or used buildings to suit your project needs and budget. And as Registered Builder with licensed trades at our disposal, we provide a total installation service for our clients.

RELOCATIONS AND REFURBISHMENT

We have extensive experience in the decommissioning, relocation and refurbishment of accommodation, kitchens and non-process infrastructure, anywhere in Western Australia.

HIRE AND SALES

Remote Group WA has a range of buildings available for short or long term Hire or Sale. Building types vary and stock levels fluctuate, however we can typically source within short lead times.

CAPABILITIES

Our capabilities allow us to offer all-encompassing professional services and construction project management and enable us to undertake the most challenging construction projects of various sizes in remote locations. Our seamless process allows our clients to enjoy their completed projects without the stress of detailed oversight throughout their duration.

DESIGN

Our design team specialise in the development and presentation of projects from early concepts, to working drawings and as built packages.

ENGINEERING AND CERTIFICATION

Remote Group WA aligns with experienced engineers and specialist consultants to take your project from concept, through the detailed approvals process and final certification and occupancy, without the need for further external resources.

PROJECT MANAGEMENT

You will have one single point of contact when you engage with Remote Group WA – your own dedicated project manager who is commercially and trade savvy enough to service you at all stages of the project.

SAFETY AND ENVIRONMENT

Safety is our First Value, and you can be assured that Remote Group WA has appropriate HSE systems and processes in place to deliver compliance and performance against stringent criteria.

05

OUR TEAM

Our team of professionals has been undertaking remote work for decades, and are all appropriately qualified and screened prior to accessing site to undertake works.

As a registered builder that is aligned to industry leading consultants and service providers, Remote Group WA can deliver complicated projects, to the highest of quality and exacting standards.

WHY CHOOSE US

Remote Group WA is a group of professionals, with decades long experience, specialising in infrastructure for remote mining projects, including design & construction, certification, installation, refurbishment and relocation of villages and NPI.

We'll source it, hire it, sell it, install it and maintain it. Or anything in between.

We enhance mining communities by providing all the modern conveniences of home, in remote locations, specialising in the installation of both permanent and temporary modular portable buildings, mining camps, non-process infrastructure, operational and recreational facilities.

COMPREHENSIVE

We offer a one-stop shop, creating value and ease for our clients. If you like, we can put you in touch with past clients.

ACCOUNTABILITY

We're old school. A handshake is the premise on which we operate, so we are Accountable for our actions and undertake to deliver on our commitments.

ATTENTION TO DETAIL

We take care of the detail ensuring our preparation and planning is first class to enable flawless execution.

REPUTATION

We keep it simple. We aspire to be welcomed back wherever we've been, and we do this by focusing on what matters to our people and our customers.
